*\* amended  
request*

Increased power levels from 230 kv to 500 kv on Bonneville Power Administration lines between Monroe and Sno-King continue to have an adverse impact to those of us living near the subject power lines. Based on recent discussions with BPA representatives it is clear that these impacts were not anticipated and testing is underway to fully understand the problems.

This letter is a request under the Freedom of Information Act.

I request the following, all studies, reports, memoranda, analyses and other documents of any nature, relating to or reflecting consideration by the Bonneville Power Administration (including its consultants) of the likely and/ or potential affect of increasing the voltage in the SnoKing Tap to Monroe-Echo Lake 500-kV Transmission Line whether dated before or after implementing said increase.

Also, all studies, reports, memoranda, analyses and other documents of any nature, relating to or reflecting consideration given by the Bonneville Power Administration to addressing concerns expressed by homeowners following the recent increase in voltage in the SnoKing Tap to Monroe-Echo Lake 500-kV Transmission Line.

\* Additionally, we request the original permit(s) that BPA submitted, and it's acceptance document(s), allowing for the construction of this section of power line.

We would greatly appreciate receiving a copy of the pertinent documentation or providing us appropriate titles and/or references if those materials have been provided to our public libraries. Thank you for your consideration and assistance with this matter.

I am willing to pay fees for this request up to a maximum of \$ 50.00. I am an individual seeking information for personal use and not for a commercial use.

Sincerely,

President of SoundDown Organization
